

Your Booth 3-ring parachute release your life may depend on it how much do you know about it ?

Maintenance ...

Should be done -

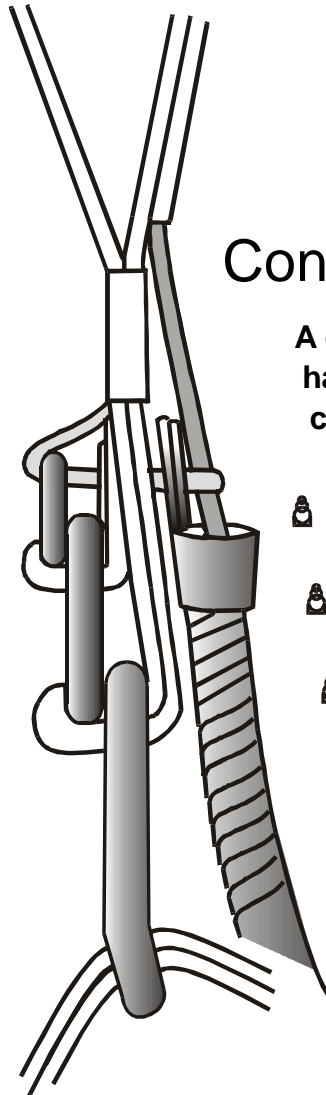

MONTHLY

- 🔧 Pull and clean the cables,
- 🔧 Flex the webbing,
- 🔧 Rotate the rings and check for bends and elongation,
- 🔧 Check around the riser grommet for webbing failure.

Construction...

A correctly built 3-ring will have the following characteristics:

- 🔧 Metal to metal contact of the rings,
- 🔧 The rings in parallel alignment,
- 🔧 The locking loop long enough to allow the small ring some play,
- 🔧 The grommet on the cable end housing aligned with the riser grommet,
- 🔧 The middle ring is NOT bent.

Re-assembly ...

- 🔧 Do not reverse the risers, line check if necessary,
- 🔧 Ensure each ring passes through only one other ring and that the locking loop passes through only the small ring,
- 🔧 Do not kink the cables or twist the locking loop during assembly,
- 🔧 Carefully inspect the 3-ring prior to each jump.
